Objective

I am consistently striving to engage with my knowledge to acquire useful skills and continually challenge myself to become a better performer in alignment with the company's needs. As a quick learner and team player, I enjoy exploring new concepts and am adaptable to various technologies.

EDUCATION

St. Vincent Pallotti College of Engineering and Technology Bachelor of Computer Science and Engineering (Cyber Security)	2024 - 2027 Nagpur, Maharashtra
Priyadarshini Polytechnic , Nagpur Diploma in Computer Technology with Percentage of 79.65%	2023- 2024 Nagpur, Maharashtra
Nirala junior College (State Board) Senior Secondary (XII) with Percentage of 93.5%	2020-2021 Nagpur, Maharashtra
Sanjuba High School (CBSE) Secondary (X) with Percentage of 88.4%	2018-2019 Nagpur, Maharashtra

SKILL SUMMARY

- **Languages:** C/C++ , HTML,CSS,Javascript
- **Platforms :** Turbo C,VS Code, Forage
- **Domain Knowledge :** Cybersecurity (IAM, Access Management), Web Development Fundamentals
- **Soft Skills :** Business Process Alignment ,Business Process Analysis ,Communication , Critical Thinking ,IAM Design , IAM evaluation ,IAM Fundamentals ,Problem Solving , Project Planning ,Solution Design ,Strategy Assessment

INTERNSHIP

Web Development Internship in Unisoft Technologies • Worked with HTML, CSS, JavaScript to build responsive web pages.	June 2023 - July 2023
--	------------------------------

CERTIFICATES

- Tata Cybersecurity Security Analyst Job Simulation – Forage (July 2025)|** [Certificate](#)
- Completed a job simulation involving identity and access management (IAM) for Tata Consultancy Services, collaborating with a Cybersecurity Consulting team.
 - Acquired expertise in IAM principles, cybersecurity best practices, and strategic alignment with business objectives.
 - Delivered comprehensive documentation and presentations, showcasing the ability to communicate complex technical concepts effectively.

PROJECTS

Career Decision System

- Built a machine learning model to predict suitable career paths based on individual interests and responses.
- Collected and preprocessed user input data for accurate model training and evaluation.
- Deployed the trained model into an interactive interface for real-time predictions.
- Achieved high accuracy by using classification algorithms and performance tuning techniques.

Gym Management System

- Developed a web-based gym management platform using HTML, CSS, JavaScript, and Node.js. Implemented a database-backed system to store and manage user profiles, workout plans, and subscription details.
- Enabled real-time updates and validations for member check-ins and registrations.
- Enhanced user interface for admin and members to ensure easy navigation and efficient data handling.

Mood-Based Music Player (Android App)

- Designed and developed an Android music player app that classifies songs based on user mood.
- Integrated mood recognition feature to auto-sort songs into categories like Happy, Sad, Energetic, etc.
- Enabled smooth playback control, playlist creation, and dynamic UI changes based on mood.
- Optimized performance and achieved low-latency response with Android MediaPlayer APIs.
